

## AGS-400 Series Mini Goniophotometer Systems

Hoffman Engineering, North America's leading supplier of Goniophotometric test systems, is proud to introduce a new generation of goniophotometers.

This unique series offers a variety of scaled versions (12", 18" & 30") of our popular AGS-100 Gonio-photometric test systems (48", 72" & 96"), in a compact package, while retaining all of the features and accuracies of their larger predecessors. Their open gantry design also eliminates interferences above 80 degrees. These positioners are designed for complete goniophotometric measurements in accordance with SAE, ECE, JIS, IMO, and other industry standards.

While designed with the engineer in mind, the AGS-400 Series Goniometers are capable of handling your production requirements as well. Their compact size also allows you the flexibility of taking the test system where you need it.

Best of all, it is produced by the most dependable name in the industry...Hoffman Engineering!

### General System Specifications:

Angular resolution:	0.01 degree
Angular display:	0.01 degree
Angular accuracy:	0.01 $\pm$ 0.005 degrees
Horizontal range:	180 degrees left and right
Vertical range:	90 degrees up, 90 degrees down
Test Article Weight Limit:	40 lbs. (12Kg)

Rev. B – 6/02
